ASWINJITH P

Backend Developer | Fintech & Scalable Systems (PHP · Laravel · APIs · Payments)

Ernakulam, Kerala · +91 9846339872 · aswinjithp7@gmail.com · LinkedIn: in/aswinjith-p

PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building high-availability fintech platforms and API-driven systems using PHP and Laravel. Specialized in UPI Pay-In, Payouts, AutoPay, QR payments, and KYC workflows. Strong expertise in secure transaction processing, microservices architecture, authentication, database optimization, and scalable backend design for product-based applications.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript
Frameworks: Laravel, React, Next.js
Databases: PostgreSQL, MySQL, MongoDB
Backend: REST APIs, Microservices, Authentication & Authorization, Payment Gateway Integration, Webhooks
Fintech: UPI Pay-In, Payouts (IMPS/RTGS/NEFT), AutoPay, QR Payments, KYC
Tools: Git, Cloud Services, TanStack Query

PROFESSIONAL EXPERIENCE

Synctric Technology Pvt Ltd — Laravel Developer | Nov 2023 – Present

• Architected and maintained scalable fintech backend systems supporting Pay-In, Payout, AutoPay, QR payments, invoicing, and merchant onboarding.
• Designed secure REST APIs with token-based authentication, role-based access control, and webhook handling.
• Implemented UPI AutoPay recurring payment flows using API-based initiation and schedule management.
• Optimized database queries and backend logic to improve system performance and transaction reliability.

Reubro International — Laravel Developer | Dec 2022 – Jul 2023

• Built payout automation platforms enabling fast and reliable IMPS, RTGS, and NEFT transactions.
• Developed employee management and tracking systems with hierarchical roles and permissions.
• Created reusable backend modules for payments, reporting, user management, and admin dashboards.

KEY PROJECTS

Fintech Payment Suite: End-to-end payment platform with Pay-In, Payout, AutoPay, KYC, invoicing, payment pages, QR payments, and credit card processing.
Payout Automation Platform: High-reliability payout system supporting multiple banking rails.
AutoPay System: Recurring UPI payment solution for merchants using intent and API-based flows.
Freelance Service Platform: Marketplace with bidding, profiles, project management, and secure transactions.
